Subject: Follow up items from this morning's meeting

I had a chance to talk with Patrice this afternoon on a couple of items that came up in our meeting:

1. Pecking – Rick is working with the Union on whether additional pecks are warranted. I may have an update later this week; if not I'll follow up with Rick on Monday prior to our meeting on Tuesday.
2. The charging for people who are working on the Gold King Mine spill is still being decided. Once a decision is made, we hope to have a mailer out to folks on how to handle their time. At this point, Patrice suggests that anyone who works on the site keep track of the days they worked on the site, the number of hours and in what capacity (working in the EOC, deployed to the site, etc.). This would include hours spent during your regular work day, as well as the time people have been called on to work after hours and on weekends.
3. At this point I understand that the costs related to the spill will be paid out of SF dollars.

Hope that helps- we'll continue to share information with you as it becomes available.

Thanks!
D
